Professional Summary

Final-year B.Tech student in Electronics and Communication Engineering with a Minor in Computer Science, passionate about Software Engineering, Data Engineering, and Generative AI. Experienced in building AI-powered applications, full-stack web platforms, and scalable data pipelines using Java, Python, SQL, FastAPI, PySpark, and modern AI technologies. Seeking Software Engineering and Data Engineering opportunities to build impactful products.

Technical Skills

Programming: Java, Python, SQL, JavaScript

Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Web Development: React.js, Node.js, Express.js, FastAPI, HTML, CSS, REST APIs

Data Engineering: Databricks, PySpark, Apache Spark, ETL Pipelines, Data Warehousing, Data Modeling, Medallion Architecture

Generative AI: Retrieval-Augmented Generation (RAG), FAISS, SentenceTransformers, Gemini API, Prompt Engineering

Databases: MySQL, Firebase

Tools: Git, GitHub, VS Code, Linux, Jupyter Notebook, AWS (Basics)

Internships / Experience

AICTE EduSkills

Jun 2026 – Aug 2026

AI-ML Virtual Intern (Google for Developers)

- Successfully completed an 8-week AI-ML Virtual Internship under the AICTE-EduSkills Virtual Internship Program.
- Gained practical exposure to Artificial Intelligence and Machine Learning through structured technical learning.
- Completed the 2026 program, supported by Google for Developers and the India Edu Program.

Education

Vishnu Institute of Technology, Bhimavaram

Sep 2023 – May 2027

Bachelor of Technology in Electronics and Communication Engineering

CGPA: 8.75

Vishnu Institute of Technology, Bhimavaram

Sep 2025 – May 2027

Minor Degree in Computer Science

CGPA: 9.50

Projects

CareerLens AI – AI Career Intelligence Platform | *FastAPI, Python, React, RAG, FAISS, Gemini API*

- Built a full-stack AI-powered career intelligence platform that performs ATS analysis, identifies skill gaps, evaluates interview readiness, and generates personalized career roadmaps using **Retrieval-Augmented Generation (RAG)**.
- Designed semantic retrieval pipelines using **FAISS**, **SentenceTransformers**, embedding generation, and **FastAPI REST APIs** to deliver context-aware resume analysis and role-specific recommendations.
- Implemented resume parsing, vector indexing, ATS scoring, executive AI reports, interview readiness analysis, downloadable PDF reports, and a modern React-based dashboard with real-time AI insights.

Retail Sales Data Pipeline | *Databricks, PySpark, SQL*

- Built an end-to-end retail analytics pipeline using **Databricks**, **PySpark**, and **SQL** for data cleaning, validation, transformation, and reporting.
- Implemented Bronze, Silver, and Gold layers following the **Medallion Architecture** to build reliable and scalable ETL workflows.
- Performed joins, aggregations, window functions, and reusable transformations to generate analytics-ready datasets for business reporting.

Certifications and Achievements

– Databricks Certified Data Engineer Associate	2026–2028
– Programming in Java – NPTEL Elite (100/100 • Top 1%)	Jan–Apr 2026
– Cloud Computing – NPTEL Elite (86/100 • Top 5%)	Jan–Apr 2026
– Introduction to Internet of Things – NPTEL Elite (Elite, Score: 77%)	Jan–Apr 2025
– CCNA: Introduction to Networks – Cisco Networking Academy	Jul 2026
– SQL and Relational Databases 101 – IBM Skills Network	Jun 2026
